## **NEW AMERICANS IN VERMONT: The Political and Economic Power of Immigrants, Latinos, and Asians in the Green Mountain State**

Immigrants, Latinos, and Asians account for growing shares of the economy and population in Vermont. Immigrants (the foreign-born) make up 4.4% of the state's population, and well over half of them are naturalized U.S. citizens who are eligible to vote. "New Americans"—immigrants and the children of immigrants—account for 4.3% of registered voters in the state. Immigrants are not only important to the state's economy as workers, but also account for millions of dollars in tax revenue and consumer purchasing power. Moreover, Latinos and Asians (both foreign-born and native-born) wield \$479.2 million in consumer purchasing power, and the businesses they own had sales and receipts of more than \$450 million and employed more than 2,400 people at last count. At a time when the economy is in a slump, Vermont can ill-afford to alienate such a significant component of its labor force, tax base, and business community.
