## **NEW AMERICANS IN WEST VIRGINIA: The Economic Power of Immigrants, Latinos, and Asians in the Mountain State**

Immigrants, Latinos, and Asians account for growing shares of West Virginia's population and economy. Immigrants (the foreign-born) make up 1.2% of the state's population, and nearly half of them are naturalized U.S. citizens who are eligible to vote. Immigrants not only contribute to the state's economy as workers, but also account for millions of dollars in tax revenue and consumer purchasing power. Moreover, Latinos and Asians (both foreign-born and native-born) wield \$1.2 billion in consumer purchasing power, and the businesses they own had sales and receipts of \$722.8 million and employed more than 5,600 people at last count. At a time when the economy is in a slump, West Virginia would be ill-advised to alienate a significant component of its tax base and business community.
