NEW AMERICANS IN THE EVERGREEN STATE: The Political and Economic Power of Immigrants, Latinos, and Asians in Washington

Immigrants, Latinos, and Asians account for growing shares of the economy and electorate in Washington. Immigrants make up one-in-eight Washingtonians, and more than 40% of them are naturalized U.S. citizens who are eligible to vote. “New Americans”—immigrants and the children of immigrants—account for 7.5% of registered voters in the state. Immigrants are not only integral to the state’s economy as workers, but also account for billions of dollars in tax revenue and consumer purchasing power. Moreover, Latinos and Asians wield \$30 billion in consumer purchasing power, and the businesses they own had sales and receipts of \$8.6 billion and employed more than 60,000 people at last count. At a time of economic recession, Washington can ill-afford to alienate such a critical component of its labor force, tax base, and business community.

Immigrants and their children are growing shares of Washington’s population and electorate.

- **The foreign-born share** of Washington’s population rose from 6.6% in 1990,¹ to 10.4% in 2000,² to 12.3% in 2007,³ according to the U.S. Census Bureau. Washington was home to 795,179 immigrants in 2007,⁴ which is roughly the total population of San Francisco, California.⁵
- **41.8% of immigrants (or 332,755 people) in Washington were naturalized U.S. citizens** in 2007⁶—meaning that they are eligible to vote.
- **7.5% (or 231,755) of registered voters** in Washington were “New Americans”—naturalized citizens or the U.S.-born children of immigrants who were raised during the current era of immigration from Latin America and Asia which began in 1965—according to an analysis of 2006 Census Bureau data by Rob Paral & Associates.⁷

Nearly 1 in 6 Washingtonians are Latino or Asian.

- **The Latino share of Washington’s population** grew from 4.4% in 1990,⁸ to 7.5% in 2000,⁹ to 9.4% (or 608,032 people) in 2007.¹⁰ The **Asian share of the population** grew from 4.0% in 1990,¹¹ to 5.5% in 2000,¹² to 6.6% (or 426,916 people) in 2007,¹³ according to the U.S. Census Bureau.
- **Latinos accounted for 4.8% (or 148,000) of Washington voters** in the 2008 elections, and **Asians 4.3% (132,000)**, according to the U.S. Census Bureau.¹⁴

Latino and Asian entrepreneurs and consumers add tens of billions of dollars and tens of thousands of jobs to Washington’s economy.

- The 2009 purchasing power of Asians in Washington totaled \$16.6 billion—an increase of 454.6% since 1990. Latino buying power totaled \$13.4 billion—an increase of 552.2% since 1990, according to the [Selig Center for Economic Growth](#) at the University of Georgia.¹⁵
- Washington’s 26,890 **Asian-owned businesses** had sales and receipts of \$7.1 billion and employed 44,938 people in 2002, the last year for which data is available.¹⁶ The state’s 10,261 **Latino-owned businesses** had sales and receipts of \$1.5 billion and employed 15,852 people in 2002, according to the U.S. Census Bureau’s Survey of Business Owners.¹⁷

Immigrants are integral to Washington’s economy as workers and taxpayers.

- Immigrants comprised 14.2% of the state’s workforce in [2007](#) (or 479,161 workers), according to the U.S. Census Bureau.¹⁸
- Immigrants contributed \$1.48 billion in tax revenue to the Washington state economy in [2007](#), accounting for 13.2% of all taxes paid in the state, according to a 2009 study by OneAmerica.¹⁹
- Unauthorized immigrants comprised roughly 3.5% of the state’s workforce (or 120,000 workers) in [2008](#), according to a report by the Pew Hispanic Center.²⁰
- If all unauthorized immigrants were removed from Washington, the state would lose \$14.5 billion in economic activity, \$6.4 billion in gross state product, and approximately 71,197 jobs, even accounting for adequate market adjustment time, according to a report by the [Perryman Group](#).²¹

Immigrants are integral to Washington’s economy as students.

- Washington’s 15,943 **foreign students contributed \$384.8 million** to the state’s economy in tuition, fees, and living expenses for the 2008-2009 academic year, according to the [National Association of Foreign Student Advisers](#) (NAFSA).²²

Naturalized citizens excel educationally.

- In Washington, 31.6% of foreign-born persons who were naturalized U.S. citizens in [2007](#) had a bachelor’s or higher degree, compared to 26.8% of noncitizens. At the same time, only 17.6% of naturalized citizens lacked a high-school diploma, compared to 36.1% of noncitizens.²³
- The number of immigrants in Washington with a college degree increased by 46.8% between 2000 and 2007, according to [data](#) from the Migration Policy Institute.²⁴
- In Washington, 70.6% of all children between the ages of 5 and 17 in families that spoke a language other than English at home also spoke English “very well” as of [2007](#).²⁵
