**NEW AMERICANS IN THE SHOW ME STATE:  
The Political and Economic Power of Immigrants, Latinos, and Asians in Missouri**

Immigrants, Latinos, and Asians account for growing shares of the economy and electorate in Missouri. Immigrants make up 3.5% of the state's population, and nearly 40% of them are naturalized U.S. citizens who are eligible to vote. "New Americans"—immigrants and the children of immigrants—account for 3.1% of registered voters in the state. Immigrants are not only integral to the state's economy as workers, but also account for billions of dollars in tax revenue and consumer purchasing power. Moreover, Latinos and Asians wield more than \$7.5 billion in consumer purchasing power, and the businesses they own had sales and receipts of more than \$2.6 billion and employed more than 20,000 people at last count. At a time of economic recession, Missouri can ill-afford to alienate such a critical component of its labor force, tax base, and business community.
